

Hospital Diagnostic Report

Date: 2025-06-04

Blood Test - Cardiac Enzymes Report

Cardiac Enzyme Results:

- Troponin I: 0.15 ng/mL (Normal < 0.04 ng/mL) - Elevated
- CK-MB: 9.0 ng/mL (Normal < 5.0 ng/mL) - Elevated
- Myoglobin: 85 ng/mL (Normal < 72 ng/mL) - Slightly Elevated
- LDH: 280 U/L (Normal 140-280 U/L) - High-Normal

Interpretation:

Elevated cardiac biomarkers are consistent with myocardial cell damage, supporting a diagnosis of unstable angina or NSTEMI.

Further monitoring and serial testing over the next 6 hours are recommended.
