

Hospital Diagnostic Report

Date: 2025-06-04

Chest X-Ray Report

Chest X-Ray Findings:

- Heart Size: Enlarged, suggesting cardiomegaly.
- Lung Fields: Clear bilaterally, no signs of consolidation or mass.
- Pleura: No pleural effusion or pneumothorax observed.
- Diaphragm: Normal contour, no elevation.

Interpretation:

Mild cardiomegaly noted without evidence of acute pulmonary pathology.

Recommendation for echocardiography to further evaluate cardiac function.
