

# Hospital Diagnostic Report

Date: 2025-06-04

## ECG Report

### ECG Findings:

- Rhythm: Normal sinus rhythm with occasional premature ventricular contractions (PVCs).
- Rate: 82 bpm
- Axis: Normal
- Intervals: PR = 160 ms, QRS = 94 ms, QTc = 410 ms
- ST Segment: Mild depression in leads II, III, aVF suggesting ischemia.
- T Wave: Inverted in lead III

### Interpretation:

These findings suggest mild myocardial ischemia. The presence of PVCs is noted but not currently life-threatening.

Clinical correlation recommended. Continuous ECG monitoring advised during hospital stay.
